GROHE COMPOSITE SINK

STYLISH LOOK,
UNRIVALLED PERFORMANCE

No matter what your kitchen design is, there is a GROHE sink that compliments it perfectly. Simply choose from our various sizes and configurations, while installation is effortless and the benefit speaks for themselves.

Hot pots? No problem! Made of acrylic resin and 80% quartz, GROHE composite sinks are resistant to heat (up to 280°C), scratches, stains, dents and cracks. A beautiful centerpiece tough enough for any job

Ever feel bothered by the noise of running water in the sink? Thanks to GROHE Whisper technology, this noise is reduced to a minimum. What's more, the composite material does not fade in UV light, keeping your sink looking as good as day one in years to come.

EASY INSTALLATION

Equipped with pre-punched faucet holes, no additional tools are required.

SPACIOUS BOWL

With a generous depth of at least 20cm, you can now wash large pots and fill vases with ease.

AUTOMATIC WASTE FITTING

Simply turn the automatic waste handle to turn on the waste fitting. No more plunging your hand into dirty water again.
