**SLEEK, STURDY  
STYLISH**  
GROHE KITCHEN SINKS

# GROHE STAINLESS STEEL SINK

## BEAUTIFUL, SPARKLING SURFACE

Our above-standard grade stainless steel, coupled with our patented brushing technique results in a bright finish that is durable against rust and corrosion, as well as a smoother, less porous surface that makes cleaning a breeze.

### OVERFLOW

Avoids any spillage of water in case the faucets are inadvertently left open.

### REDUCED WATER NOISE

Shh! A special insulation on the underside of the sink means that noise from running water and handling pots and pans is reduced to a minimum.

### SPACIOUS BOWL

With a generous depth of at least 20cm, you can now wash large pots and fill vases with ease.

# GROHE COMPOSITE SINK

## EXCEPTIONALLY DURABLE

Hot pots? No problem! Made of acrylic resin and 76% quartz, GROHE composite sinks are resistant to heat, scratches, stains, dents and cracks. A beautiful centerpiece tough enough for any job.

Ever feel bothered by the noise of running water in the sink? Thanks to GROHE Whisper technology, this noise is reduced to a minimum. What's more, the composite material does not fade in UV light, keeping your sink looking as good as day one in years to come.

### EASY INSTALLATION

Equipped with pre-punched faucet hole, no additional tools are required.

### AUTOMATIC WASTE FITTING

Simply turn the automatic waste handle to turn on the waste fitting. No more plunging your hand into dirty water again.

*(optional upgrade to push excenter)*

### WATER DRAINAGE

Good drainage is ensured by the elegant diamond-shaped creases that make the water flow away more easily.
